SERIES

WATER TREATMENT SYSTEM

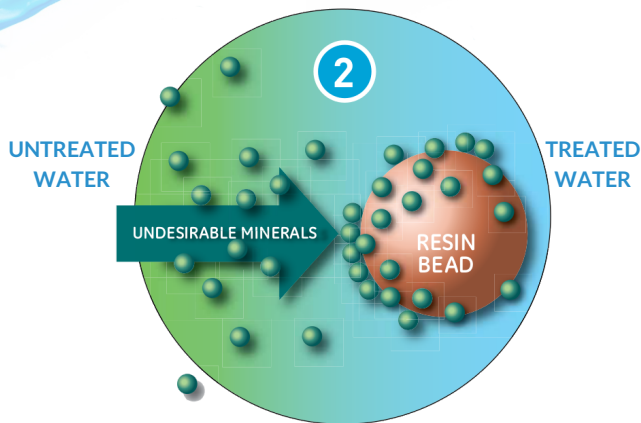

- No more dry skin or brittle hair
- Preserve and extend the life of your appliances, fixtures & plumbing
- Save time and money on detergents and soaps
- Spend less time cleaning lime scale & build-up
- Softer and brighter clothes

Ensure the Best Quality Water for your Home

HOW IT WORKS

1. Unconditioned water passes through a bed of resin beads.
2. Undesirable minerals are attached to the surface of the resin beads.
3. All undesirable minerals are removed as water passes through the resin beads reaches the bottom of the tank.
4. The conditioned water is distributed throughout the plumbing system.
5. Brine solution is used to recharge the resin beads.

REMOVES

- *Hard Water*
- *Iron*
- *Sediment*
- *Slight Taste & Iron Odor*

PRODUCT HIGHLIGHTS

- 3/4" Single Lever Bypass
- 1" Internal Components
- 19 GPM Flow Rate
- Piston Driven Valve
- On Demand Regeneration
- Low-Flow Metering Capabilities
- Optional Manual Regeneration
- Sealed Environmental Cover
- High Capacity Cation Resin
